

Blackout Protocol – Ritual Handbook (Simplified)

Rituals are symbolic acts of collective meaning-making.
They are not dogma but frameworks for participation.

1. The Three Foundational Rituals

1. Ignition – The first commitment: each participant writes a personal “Why” and hashes it on-chain.
2. Reflection – A cycle of questioning: “What must be let go before renewal can begin?”
3. Contribution – An act of creation: a narrative fragment, a code module, a symbolic gesture recorded on the protocol.

2. Ritual Verification

- Each ritual submission is signed cryptographically.
- Oracles confirm validity and log context in the Hestia Log.
- Ritual outcomes become part of the shared narrative archive.

3. Ethical Commitments

- Transparency over control.
- Inclusion over uniformity.
- Curiosity over certainty.
- Every ritual is an experiment in shared meaning.
